

# PARTNERS

## FOR ENDOSCOPY

### STATEMENT OF COMMITMENT

#### SCAN4SAFETY (GS1 and PEPPOL) Adoption

Further to the NHS eProcurement Strategy which was published in 2014 which mandates the implementation of GS1 and PEPPOL standards for all suppliers to the NHS, to enable interoperability between existing NHS provider systems and Supplier systems for increased efficiency and patient safety.

Partners for Endoscopy fully support this initiative and are suppliers of Class I, Class I sterile, Class IIa and IIb medical equipment, consumables and accessories to the NHS.

As a company we have already:-

- Identified a Scan4Safety (GS1/PEPPOL) Project Lead.
- Have joined GS1.
- Have Identified a GLN (Global Unique Location Number) for our site.
- Begun allocating GTINs (Global Trade Item Numbers) to our products.
- Commenced the use of GS1 barcode/data matrix on our product packaging labels.
- Joined a PEPPOL access point.
- Commenced collating data attribute information for all products.

With a view to achieving full compliance with GS1 and PEPPOL ahead of the Department of Health compliance timeline.

Until full implementation is achieved we have committed to complete the 6 monthly Supplier Self-Declaration.
